# Motorola Droid for Hosted Exchange

1. From the home screen, touch the **Applications** tab (located on the bottom of the screen), then touch **Email**.
   If this is an additional email account, touch **Menu** > **Accounts** > **Menu** > **Add account**.

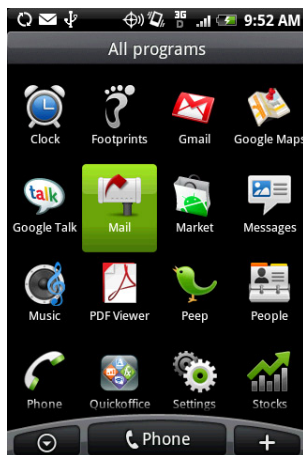

2. Enter your Exchange hosted email address and password then touch **Next**.
3. Enter the exchange server settings in the appropriate fields. When you configure the device for Exchange, use the settings, that can be found in HostPilot or MyMailboxManager under *Services > MS Exchange Server > ActiveSync*:
   - **Domain\Username**: DTHOSTING\username
   - **Password**: Exchange mailbox password
   - **Exchange Server**: **wm5.datatechhosting.com** or **mymail.datatechhosting.com**
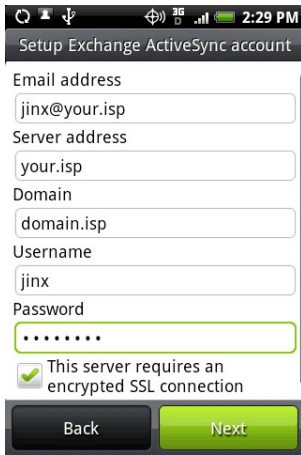

4. Ensure that **Use secure connection (SSL)** and **Accept all SSL certificates** are checked then click **Next**.
5. Touch the **Email Checking** frequency dropdown to set the desired frequency.
6. Touch the **Amount to synchronize** dropdown to set the desired amount.
7. Touch the desired account options then touch **Next**.
   The account option is enabled if a green check mark is present.
   - o   Send email from this account by default.
   - o   Notify me when email arrives.
   - o   Sync contacts from this account.
8. Enter an account name and outgoing message name then touch **Done**.
Other Droid phones for Exchange

1. From the device home screen touch the **Applications** tab (located in the lower-left), then touch **Mail**.
   If this is an additional email account, touch **Menu** > **More** > **New Account**.

2. Touch **Microsoft Exchange ActiveSync**
3. Enter the exchange Primary Email Address and password then touch **Next**.
4. Ensure the Exchange server settings are correct.
   - o   **Email address**: your Primary Email Address
   - o   **Domain**: DTHOSTING
   - o   **Username**: enter your Hosting Username.
   - o   **Password**: Exchange hosting password.
5. Touch **Next**
6. Doublecheck all settings, make sure that:
   - o   **Server name**: **wm5.datatechhosting.com** or **mymail.datatechhosting.com**
   - o   "**This server requires an encrypted SSL connection**" is checked and the check mark is green.

7. Touch **Next**
8. Select the desired data to synchronize with the exchange server (enabled when a green check mark is present)

9. Touch **Finish setup**.
