

Managed IT Security Services

for IT Compliance

Federal and State laws and regulations, coupled with complex industry specific rules, created compliance requirements that may seem overwhelming to many organizations. Data-Tech can provide vulnerability assessment and remediation to analyze what risks exist and protect your organization. We use state-of-the-art scanning technology to search for vulnerabilities in your system. Our scanning procedures meets or exceeds industry standards and regulations in-

Data-Tech's Managed IT Security Services will provide a comprehensive and affordable protection solution for your IT compliance with regulatory requirements.

Endpoint Security

With the powerful Antivirus and Malware protection you can enhance and extend support for the IT service delivery process by including an essential security protection component. **Including automatically updates for all Virus and Malware signatures every hour.**

Software Security Patch and Policy Management

Define, manage, apply and enforce IT policies and Security Patches across multiple groups of machines, ensuring distributed machines are secure, in compliance and managed consistently across the organization.

Audit and Inventory

Perform Fast, accurate and up-to-date Audit and Inventory of computers, servers, and mobile devices. Deployable over the LAN, WAN, and Internet. With multi-user and single-user (workstation) computer operating system access controls including: user authentication, data access authorization, audit logs; application security

Audit Logging, Management and Alerting

Audit logs that record user and system activities, exceptions, and information security events should be produced, and kept for an agreed-upon time period, to assist in future investigations and access control monitoring. This could include recording, when relevant and within the capacity of the logging system, all key events.

Report Generation

Generate reports that contain filtered log entries. Receive a daily report that contains a list of selected critical alerts. Create detailed reports on demand.
